### DETAILED ACTION

1. This application is in condition for allowance except for the following formal matters:

Election/Restrictions:

Applicant's election with traverse of Group I (claims 1-10) in the reply filed on 8/30/05 is acknowledged. The traversal is on the ground(s) that the examiner has not established a prima facie case of serious burden of examination of the inventions of Groups I and II together. This is not found persuasive because the inventions of Group I, II and III each have a separate status in the art and clearly have a separate field of search, and the search required for Group I is not required for Group II. Moreover, these inventions are distinct for the reasons given above and are indicated in the previous action that they have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper. In accordance with MPEP §803, the examiner has demonstrated that the inventions of Group I and II are each independent or distinct as claimed and a serious burden would be placed on the examiner as discussed above. The requirement is still deemed proper and is therefore made **FINAL**. Thus claims 11-15 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected Group II Invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 8/30/05.

The drawings:

Art Unit: 3729

The drawings in general are objected to because they fail to show every feature of the invention specified in the claims (see 37 CFR 1.83(a)). Therefore, "a base body" (claim 1, line 7) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The specification:

The disclosure is objected to because it fails to disclose what is being claimed as a base body as set forth in claim 1, line 7. Correction is required. See MPEP § 608.01(b).

In the claims:

"A disassembly tool " (claims 2-10, line 1) should be changed to: --The disassembly tool--, so as to reflect the dependent claim formats.

Claims 11-15 have been cancelled. (see Applicant's remarks, page 1, and dated 8/30/05).

\* Further, Applicant should carefully revise the disclosure and correct any other typos error in the claims and/or specification to clearly recite the claimed invention.

2. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
